The Class List on the portal homepage displays a basic summary of all class data for classes the student is currently enrolled in. Students can filter their classes by class status: active, future, past, or withdrawn. Block and time information for each class will also be available. If the class is not meeting today, “Not Scheduled Today” will appear in place of the time.

Parents can also view whether any of their student’s classes have notifications. Notifications total in the “New Notification” box in orange so parents can easily view any assignment(s) that need attention. Clicking on the **notifications** button opens the “Notifications” filter on the “Assignments” tab on the class detail page. Assignments with unread updates will be highlighted in yellow.

The diagram illustrates an assignment notification in a yellow highlight. The notification text is: **Mar 03 Tue** | **Homework** Read Chapters 1-4. Three callout boxes point to specific features: 1. A blue speech bubble icon on the left is labeled "Notification email sent to student". 2. The entire notification bar is highlighted in yellow, labeled "Yellow highlight indicates assignment contains new updates". 3. A red speech bubble icon on the left is labeled "Assignment contains feedback posted by the teacher".

The portal will display a “New Update” highlight for the following changes to an assignment:

- The teacher enters or updates the student’s **score** on an assignment.
- The teacher enters or updates the student’s **completion status** on an assignment.
- The teacher posts **feedback** for an assignment.
- The teacher sends a **notification** email to the student about an assignment.
